April 04, 2023

To whom it may concern,

On March 20, 2023, the European Union put into force Regulation 2023/607 which amends the transition periods set out in Medical Device Regulation 2017/745 (MDR) Article 120 for legacy devices. The amendment extends the validity of EC certificates without the need of Notified Bodies to change the date on individual certificates. Certificate #CE 543468 remains valid until December 31, 2028, or until an MDR 2017/745 certificate is issued to CPI. CPI remains committed to completing our MDR certification within the next few months.

For more information, visit the EUR-Lex website, an official website of the European Union.
